### Down

Par 311

*Album : Flavors? American Singles*

Chill, light on my sight as my ego becomes  
A funky child with some words on my tongue  
Be like intake of breath and my mouth gets loose  
So while I scatter my spit, I dream of juice  
Have you ever made out in dark hallways  
Displayed a kiss that made your day or say  
Played a track from your record collection  
It's your mix, congratulations

**We've changed a lot and then some, some**

**You know that we have always been down, down**

**If I ever didn't thank you, you**

**Then just let me do it now**

I bet you light up when we start the show

Follow me now very closely 'cuz I told you so

You know, we glow because we throw sun rays

Yeah we be freaky and we wanna stay

**We've changed a lot and then some, some**

**You know that we have always been down, down**

**If I ever didn't thank you, you**

**Then just let me do it now**

Lightning strikes, yo we be in that violent force of light

Guaranteed to turn it out as bad as dolemite

Because we're dope kid, change like a chameleon

And the channel whenever the wack show Real World is on

You know we dazzle like ghetto box boomin' battles

Rattle inside your head feel redeemed like cola bottles

Fall in love with your teachers, on the wax we are self made

Check the technique, 311 in L.A.

**We've changed a lot and then some, some**

**You know that we've always been down, down**

**If I ever didn't thank you, you**

**Then just let me do it now**

Keep my feet on the ground

Keep my head in the clouds

Electrified by the sound

Comes from the down, and

**We've changed a lot and then some, some**

**You know that we've always been down, down**

**If I ever didn't thank you, you**

**Then just let me do it now**
