Album : Don't Let Me Fall Apart

Here we go again

I just can't help myself

Deep down we go

I'm giving up again

Let down somebody else

Somebody else

Watch me

Feels like a candle burning out

The flame melts everything

Like teardrops

Wax is running down

So if you love me set me free

The only thing I feel is killing me

From the inside

I'll deny myself

And everything I did

There's nothing that I wouldn't give

Set me free

With every chance that I missed

I started to listen to the doubts creeping in

It's too sad to be true

But here we go again

I just can't help myself

Deep down we go

I'm giving up again

Let down somebody else

Somebody else

Don't waste your breath on me

Echoes of the words unsaid

Spinning bullets in my head

I'm left for dead

Like a body in the streets

They're fucking staring down on me

Watch me

I'll deny myself

And everything I did

There's nothing that I wouldn't give

But here we go again

I just can't help myself

Deep down we go

I'm giving up again

Let down somebody else

Somebody else

Don't waste your breath on me

Yeah

Here we go again

I just can't help myself

Deep down we go

I'm giving up again

Let down somebody else

Somebody else

Don't waste your breath on me

In truth I've got nothing to give

So take my hand and

pull me out of it

Will you understand

I'm just a dog that will bite the helping hand

Deep down we go

Don't waste your breath on me
