Do It Again

Par Air Supply

Album : Love And Other Bruises

I used to watch you walk away
Till the road you take would bend
I was the man to turn you on
And you knew it after all
Come tomorrow when I'm all weary
You would turn me down again
At least that's the way I can remember

(Chorus)

Do it again, Do it again, Do it again

Do it again, Do it again, Do it again

Every single word you told me got home
I'm still thinking about them
Every little secret we should have known
And we can't live without them

You surely started something

You surely gave me something new

(Chorus)

And I do think about you each now and then

And each time it gets tighter

From the road I can see the last break

And my head's getting lighter

You surely started something

You surely gave me something... you

(Chorus)

You surely started something

You surely gave me something ...you

(Chorus)
