# Nature Of Life On Earth

Par Akira the Don feat. Graham Hancock

*Album : The War On Consciousness*

---

ICIBILLET.COM

Look, what's happening in the Amazon

The lungs of our planet

This precious home of biodiversity

The old girl's rainforests being cut down

And replaced with soya bean farms so we can feed cattle

So that we can all eat hamburgers

Only a truly insane global state of consciousness

Could allow such an abomination to occur

I did a back of an envelope calculation during the Iraq war

It seems to me that six months expenditure on the Iraq war

Would have solved the problem of the Amazon forever

Sufficient to compensate the people's of the Amazon

So that no single tree ever needed to be cut down again

To gardening it and then look after the amazing resources

We can't make that decision as a global community

We can spend countless billions on warfare, on hatred

On fear, on suspicion, on division

But we can't get together the collected effort

To save the lungs of our planet

**The message of ayahuasca**

**Is about the sacred, magical, enchanted**

**Infinite, precious nature of life on Earth**

**Nature of life on Earth**

**Nature of life on Earth**

**Nature of life on Earth**

**The message of ayahuasca**

**The universal message**

**Is about the sacred, magical, enchanted**

**Infinite, precious nature of life on Earth**

**Nature of life on Earth**

**Nature of life on Earth**

**Nature of life on Earth**

And this is perhaps why shamans from the Amazon  
Are now mounting a kind of reverse missionary activity  
When I've asked shamans about the sickness of the West  
They say it's quite simple  
You guys have severed your connection with spirits  
Unless you reconnect with spirit and do so soon  
You're going to bring the whole house of cards  
Down round your heads and ours  
And rightly or wrongly, they believe that ayahuasca  
Is the remedy for that sickness  
And many now are being called to the Amazon to drink ayahuasca  
And ayahuasca shamans are traveling throughout the West  
Offering to brew, often under the radar, often at personal risk  
To bring about consciousness change  
And it's true that

**The message of ayahuasca**

**Is about the sacred, magical, enchanted**

**Infinite, precious nature of life on Earth**

**Nature of life on Earth**

**Nature of life on Earth**

**Nature of life on Earth**

**The message of ayahuasca**

**The universal message**

**Is about the sacred, magical, enchanted**

**Infinite, precious nature of life on Earth**

**Nature of life on Earth**

**Nature of life on Earth**

**Nature of life on Earth**

And the interdependence of the material and spiritual realms

It's impossible to work with ayahuasca for long

Without being deeply and profoundly affected

By this message
