02 - It Was There That I Saw Y

Par And You Will Know Us by the Trail of Dead

Album : Source Tags And Codes

It was there that I saw you

And it was there that I came

As evening sighs, rises up against the skyline

Let me come and have my love

You were fair and fey as a sun that evil day

We were bold and life was great

But as time went on, I wondered what was wrong

I wondered what became of you

Let me hold you in my arms, dear

And let me melt in the heat of your gaze

And let the clock strike one

Time and mind go marching on

Let our sense of selves decay

It was there that I saw you

In the heat of a summer's embrace

But as time went on, I wondered what went wrong

I wonder what became

Became

Became

Became

Became of you
