Par Arcadea

*Album : Arcadea*

What starts with light?

What burns the night?

When shadow consumes with its fumes

When its parts unite

All that's left behind

A wandering ghost

A visit of light reigniting

A blazing coast

We won the war

But it's miles 'til the foot will be found

And the path of a great flood will blast by itself

**Invisible waves**

**Rip and blacken the landscape**

**Absorb the force**

Source mutate the shape

**Rain, the holy fall**

**The bitter seals**

**Our light the home is**

**Rain, the holy fall**

**The bitter seals**

**Our light the home is**

Spin freely or suffer the waste

Shapeshift and contemplate

While the forces of phantoms run over

Storm your gates

Lay down your life

Shape sacrifice

Crushing, I carve every part

As the rain ignites

**Invisible waves**

**Rip and blacken the landscape**

**Absorb the force**

We take, we bend like rain

**We, separate like we**

**Reborn in velocity**

**We crash like light**

**We are the electric**

**We, separate like we**

**Reborn in velocity**

**We crash like light**

**We are the electric**

Through the corona of the sun

One true net pulls up starlight

Parched the path to the core forever
