Demonic Science

Par Arch Enemy

Album : [2009].[?ompilations].The Root of All Evil

The human blood is far too thin

The life in it much too fragile

DNA code twisted into form

An ancient dream will now be reborn

Demonic science!

A high price for a passion so intense

Demonic science!

This world no longer makes any sense

Save the best, strip away the rest

Every weakness, every bleakness will be erased

New flesh for a new world

Men in white clothes performing the ultimate test

Demonic science!

A high price for a passion so intense

Demonic science!

This world no longer makes any sense

This is the era, this is the time

A new dawn arrives

The human blood is far too thin

The life in it much too fragile

DNA code twisted into form

An ancient dream will now be reborn

Save the best, strip away the rest

Every weakness, every bleakness will be erased

New flesh for a new world

Men in white clothes performing the ultimate test

Demonic science!

A high price for a passion so intense

Demonic science!

This world no longer makes any sense

This is the era, this is the time

A new dawn arrives
