Center of the Universe

Par Axwell

Album : Future Trance Vol.65

The shadow of your smile

Under the open skies

As I close my eyes

I can feel the wind arise

We're made of stardust

Our lives ahead of us

We'll ride the magic bus into the heart of love

I can taste it, taste the feeling

Of the blue skies they're for real and

We're the center of the universe

Just you and I, and I, and I

The shadow of your smile

Under the open skies

As I close my eyes

I can feel the wind arise

We're made of stardust

Our lives ahead of us

We'll ride the magic bus into the heart of love

I can taste it, taste the feeling

Of the blue skies they're for real and

We're the center of the universe

Just you and I, and I, and I

I can taste it, taste the feeling

Of the blue skies they're for real and

We're the center of the universe

Just you and I, and I

I can taste it, taste the feeling

Of the blue skies they're for real and

We're the center of the universe
