No Hope Left For Me

Par Blues Pills

Album : Live At Freaky Valley Festival 2014

Lonesomeness is killing me

And all my trouble deep inside

With a happy heart I could no longer stand

A glow of light, he made me smile

So he took me to a long lost place

I'd never ever seen before

With a weakness for his warm embrace

For a short time I thought that he would stay

I know you won't be far

I tried to go but you just let me fall

If I could do it I would not change myself

There's no easy way, got nothing left to say

When there is no relief, no hope for me, no signs

Your words keep breaking me, they're only hurtful lies

Pain don't mind I wouldn't doubt

Have you also felt the same

Chaining up my heart and my mind

I wish I'd never let you in

My bitterness, and rightly so

No one could ever heal

Still you got me under your control

With the sick ways you got me to feel

I know you won't be far

I tried to go but you just let me fall

If I could do it I would not change myself

There's no easy way, got nothing left to say

When there is no relief, no hope for me, no signs

Your words keep breaking me, they're only hurtful lies

I know you won't be far just let me fall

If I could do it I would not change myself

If I could do it

There's no easy way

When there is no relief, no hope for me, no signs

Your words keep breaking me, they're only hurtful lies
