# No Tomorrow (P Money X Whiney remix)

Par Camo & Krooked, Mefjus & Sophie Lindinger

*Album : No Tomorrow (P Money X Whiney remix)*

Did I fail you?

Did I curse it all along?

I know tomorrow, tomorrow you'll be gone

Did I love you?

Did you ever tell me more?

I wasn't sure

Is it about me at all?

Did I fail you?

Did I curse it all along?

**I know tomorrow, tomorrow you'll be gone**

**Did I love you?**

**Did you ever tell me more?**

**I wasn't sure**

**I'll take you with me wherever I go**

**I'll keep you company, but what do I know?**

**You take no bullet for me, but I know**

**That I still care**

Emotionally confused that feeling's trapped in my views and I got used and now I don't know who to trust  
My heart went so cold because of lies that I was told now I'm alone, I don't remember how to love  
Blaming all my flaws on you when I should have supported you and now I realise I've never done enough  
Behind doors going crazy, letting inside me is Satan you sedate me when I hear you say

**I'll take you with me wherever I go**

**I'll keep you company, but what do I know?**

**You take no bullet for me, but I know**

## That I still care

All your friends they judge me ask you why you even love me they don't understand or rather see my pain  
Blinded by the lights, I know the celebrity gossip got me treating relationships like a game  
Staring in the mirror, I see nothing hasn't changed while everybody seems to think I ain't the same  
All I hear is voices saying

## You take no bullet for me

I hear them loads  
Voices I hear them throw, they slapping words they takin' control of your body, mind and your soul  
Choking on your ego, the easy way to go on this road is what they say, knowing you go  
Now they got you on your own  
Diseased is what this game is, pokerface you bound to fall  
That's just in lies you were told, the story never gets old  
You was young wise an' was bold  
Now your fate in that life is told, it's got me not answering the phone and I'm too scared to get you involved  
Keep me with you  
Have I been dreaming that you're mine?  
I know tomorrow, I need you to survive  
'Cause you did something  
I never knew that I could be  
And now you're gone  
And I'm back where I belong

## Did I fail you?

## Did I curse it all along?

**I know tomorrow, tomorrow you'll be gone**

**Did I love you?**

**Did you ever tell me more?**

**I wasn't sure**

**I'll take you with me wherever I go**

**I'll keep you company, but what do I know?**

**You take no bullet for me, but I know**

**That I still care**

**You take no bullet for me**

What do I know?

I'll keep you company

But what do I know?
