Just Another Night

Par Cat Stevens

Album : Remember Cat Stevens - The Ultimate Collection (Ecopac)

I remember standing here
Right on this first same side
I was dying but for you

It was just another night

You once wrapped me in your world
You bought me my first shoes
I was just another lonely child
Oh and you were much amused

So you took me and you dressed me well
All for your friends to see
You drained my body calmly 'til
There was no more left in me

Then you walked out and you cut me cold
Out on a road somewhere
Why it happened, well I don't know
And I still have no idea

But everybody needs a friend

Sometimes you need a little help

And who knows, maybe one day you'll seek mine

Only time will tell

You once held me in your arms

You made me feel so right

I was flying but for you

It was just another night

Oh, oh, oh

But everybody needs a little help

Whether or not you think you really do

Everybody needs a little help

Now the time has come for you

I ain't looking to fight no wars

No more talking trash

I'm not seeking anymore pain

'Cause I've had enough of that

But don't you worry, it's alright

If you should come around

Any night or any day

I won't ever let you down
