Numb

Par Christina Novelli

Album : Numb (Nifra Remix)

I just watched you leave

In the middle of the night

I didn't even cry

Did we even fight?

Now I can't sleep

I'm in way too deep

I feel numb in my teeth

No, there's nothing wrong with me

Now I'm still on the outside

Am I even scared?

I have lost my mind, it's the darkest kind

I can hardly breathe

This is suffocating me

My worst enemy is myself, and I

Tried to save my life

And every day I'm getting high

I have lost my mind, it's the darkest kind

I can hardly breathe

This is suffocating me

My worst enemy is myself, and I

Tried to save my life

And every day I'm getting high

I'm barely getting by

I lose myself inside

I'm barely getting by

I lose myself inside

I lose myself inside

I lose myself inside

I lose myself inside

I lose myself inside

I'm barely getting by

I lose myself inside
