# Illumination

Par Daktyl

*Album : Illumination*

Hide away your feelings if it helps you relax

But I'll have it with the lights all on

I won't deny it

We could be close to real

With the lights on

Bury yourself under if it helps you pass

But don't let the light grow cold

I know you're excited

But hide it

You can have my love for free

**Keep the lights on**

**Keep the lights on**

You're going out of focus

But I see you now

Left in an endless storm

Faceless, silent, technicolor hyperreal

**Keep the lights on**

Electric anticipation

I'm close can't sustain the feeling

Held in the blue of the fir?

And we can't deny it

We can't deny it

**Keep the lights on**

**Keep the lights on**
