When I Live My Dream

Par David Bowie

Album : David Bowie

When I live my dream, I'll take you with me

Riding on a golden horse

We'll live within my castle, with people there to serve you

Happy at the sound of your voice

Baby, I'll slay a dragon for you

Or banish wicked giants from the land

But you will find, that nothing in my dream can hurt you

We will only love each other as forever

When I live my dream

When I live my dream, I'll forgive the things you've told me

And the empty man you left behind

It's a broken heart that dreams, it's a broken heart you left me

Only love can live in my dream

I'll wish, and the thunder clouds will vanish

Wish, and the storm will fade away

Wish again, and you will stand before me while the sky will paint an overture

And trees will play the rhythm of my dream

When I live my dream, please be there to meet me

Let me be the one to understand

When I live my dream, I'll forget the hurt you gave me

Then we can live in our new land

Till the day my dream cascades around me

I'm content to let you pass me by

Till that day, you'll run to many other men

But let them know it's just for now

Tell them that I've got a dream

And tell them you're the starring role

Tell them I'm a dreaming kind of guy

And I'm going to make my dream

Tell them I will live my dream

Tell them they can laugh at me

But don't forget your date with me

When I live my dream
