# Spread Your Love

Par Earth Wind and Fire

*Album : The Very Best Of*

Maurice White, Beloyd Taylor & Azar Lawrence

As we speak about love today

Many men will let it drift away

Until inner feelings recognize

That inner joy will harmonize

There is one possibility

That we share universally

It don't take much ability

To let it shine naturally

Spread your love around and around the land

Spread your love to every grain of sand

**Spread your love, let's spread our love together**

**Spread your love, I can feel it getting better**

**Spread your love, let's bring our hearts**

Together

**Spread your love, spread your love around**

As you live one day at a time

Independence plays on your mind

To bring you experience

Human love is damn serious

**Spread your love, let's spread our love together**

**Spread your love, I can feel it getting better**

**Spread your love, let's bring our hearts**

Together

**Spread your love, spread your love around**

Someday the world will smile again

Someday all brothers will be friends

We will then truly understand

Inner light and universal plan

Until that time comes around

I'll be your friend through ups and downs

**Spread your love around**

**Spread your love around**

Spread your love around

Spread your love around
