Borders Fall (ft. Wubcake, Steel Chords, Cyril the Wolf)

Par Forest Rain

Album : The End Of The World

Out from my window I see fallout from the bombs
Through smoke and sadness, our young soldiers still march on
But just a month ago when we were more naive
Those soldiers were just children with futures they believed
They say enlisting is the hardest thing to do
But after that first strike I knew that I'd join too
They trained us night and day to trample any foe
We'll ship out, win the war, then come back to our homes

We heed the call

The borders fall

Protect Equestria

We're soldiers now, no backing out

We will not stop 'til they fall at our feet

These young bucks coming in, they think they know it all

Let's see how sure they are when they see their friends fall

I've served too many years to die in distant lands

But if my princess calls, I'll serve at her command

We heed the call

The borders fall

Protect Equestria

We're soldiers now, no backing out

We will not stop 'til they fall at our feet

We heed the call

The borders fall

Protect Equestria

We're soldiers now, no backing out

We will not stop 'til they fall at our feet
