XENOPHOBIA

Par Isserley

Album : MY EXTERMINATUS

A world on fire, I'm with you

You lit a spark, and I lit two

There's worlds out there, much to do

But I'd rather kill myself with you

The world is on fire

The world is on fire, and I'm still cold

And I know where those hands have been

I know where that tongue has been

I know where that body's been

I know who you've forced it in

And I don't care

I don't care

I don't care...
