Telling You Now

Par Jessy Moss

Album : The Very Best Of Smooth Jazz Vol. 2

Telling u now so's you don't have to think about it

Telling u now so's you don't have to reap what u sow

Later on

Sex in the chambers, so blame her for everything

Any bad thing, a ring, arises

But you made one mistake and that sealed us fate,

You didn't kill me, so's I can speak free

So how many times do I have to tell you

How many times do I have to make it obvious to you

So's you will do, what us supposed to

Telling you now so's you don't have to think about it

Telling you now so's you don't have to reap what you sow

Later on

Telling you now so's you don't have to think about it

Telling you now so's you don't have to reap what you sow

Later on

Wish I had told her to take him (thought she couldn't live without him)

Sometimes what you wish for will be us ruin (like to see her try to live with him)

But in a blinding lust I rushed

And certified an end to what I thought had pained me

Bloodstains don't wash out quick

But linger to remind you that you are sick

Telling you now so's you don't have to think about it

Telling you now so's you don't have to reap what you sow

Later on

Telling you now so's you don't have to think about it

Telling you now so's you don't have to reap what you sow

Later on

Plenty of times oh, I told you so

You never do know no, you never do know

Who's butt wild and, who's putting on a show

You never do know no, you never do know

Telling you now so's you don't have to think about it

Telling you now so's you don't have to reap what you sow

Later on

Telling you now so's you don't have to think about it

Telling you now so's you don't have to reap what you sow

Later on

Telling you now so's you don't have to think about it

Telling you now so's you don't have to reap what you sow

Later on

Telling u now so's you don't have to think about it

Telling u now so's you don't have to think about it

Think about it

Telling u now so's you don't have to think about it

Think about it, think about it
