AGATS2 (Insecure) [with Nicki Minaj]

Par Juice WRLD; Nicki Minaj

Album : AGATS2 (Insecure) [with Nicki Minaj] [Alternate Versions]

Aw, oh (whoa)

Oh

(Is there any way?, Is there any way?) Aw, oh

I admit it, another - got me finished

Tryna serve heartbreak up like tennis

Sipping, I'ma - gargle

Babysitter, she gon' give my kids a swallow

And her - hating, got a gun full of hollows

Load that - up, he won't live to see tomorrow

Still tripping, on fire, I'm blazin'

Inhale, it's Friday the 13th and guess, who playing? Jason

And your insecurities will get the best of me

Your insecurities will get the best of me

And your insecurities will get the best of me

Your insecurities will get the best of-

Screaming, "Demon time" like they was possessed

Let's keep it real, -, you know you was just obsessed (but it's no)

Bad women, no good, bad women

Hotel rooms and Versace linens

Wake up in the morning, scrambling for some Advil

Last night, last night was too mad real

In love with the downers so I took some sad pills

Jack Daniel's don't hold me still

Nothing like the plane ride home

I really hate the plane ride home (oh)

I'm in L.A. right now

Left the heartbreak in Chicago

And your insecurities, will get the best of me

Your insecurities will get the best of me

And your insecurities will get the best of me

Your insecurities, will get the best of me

None of these - with you

What's up with you?

Insecure, me? Nah, that be you

I left all of them to come after you

She want good brain, gotta be the muscle too

He want the smart girl, gotta be a hustler too

With me and that's just the truth

Somebody gotta teach a class like a substitute

Is there any way? Is there any way

We could be mindful of what we say?

Is there any way? Is there any way

That you would book a different plane, say you'll stay?

And your insecurities will get the best of me (say you'll stay)

Your insecurities will get the best of me (say you'll stay)

These thoughts in my brain (say you'll stay)

All girls are the same (say you'll stay)

You should stay here with me (these thoughts in my brain)

Say you'll stay
