Ohh, Ohhh

Dont be worried that i-, dont be worried that i leave

Dont be worried that i-, dont be worried that i-

ICIBILLET.COM

Don't you worry girl i won't leave

Girl be worried that you want me

I wouldn't call my self poison but i

Shouldn't be your boyfriend

Cause the devil was the one who taught me

Taught me how to grow up so im sloppy

But my momma said listen to elders

And satan is like a million and two

Maybe thats it and now

We just gotta go and wrap it up

Aint no reason to be acting up

Take my leave and then we packing up

Like the leaves we pack up in the dust

So i scream when I'm singing, what I'm feeling

When you leaving, got me leaning on no body but me

That's not the smartest thing

Got me crumbling

Just a little thing keeping me from getting free

Ohh, lit me up, lit me up, lit me up some weed

Smoke is all i breath

Black is all i see

That's infinity

I remember we used to go to the movies

Had my hand up on your booty

Felt the warmth of skin in my tummy

It was soothing

It was cooling

Why you do me like that

Guess i did it to myself too

Thinking that you'd ever come back

Sometimes when I'm in my room

I be thinking about you in the past

Then i remember that im in the present

So I'm like fuck it

Imma just forget it

Throw her in the bucket

Hell yeah i've said it

But i still love you though

It was so hard to let go

Travel to places unknown

Reaper took my soul below
