The one

Par Lionel Richie & Juliette

Album : Kuschelrock 15 - CD1

We are here all alone tonight

The two of us together

This night will last forever

We finally see the light

Whenever I close my eyes

The love that I feel comes alive

You give me the strength to climb any mountain

We know we won't break, we won't bend

No we won't

We know that our love will last until the end

This is the one that captured my heart

That makes all the difference

That feels like forever

And this is the dream I've been searching to find

I know it's taken some time

But this is the one

Passing the test of time

So many roads to travel ha

So many lives to live

Now there's me and you

Standing beside you now

I feel the fire of passion

Nothing can stop us now

'Cause there's nothing in the way

We know we are strong

And we can take it

We can take it

We know that no matter

What comes we're gonna make it

This is the one that captured my heart

That makes all the difference

That feels like forever

And this is the dream I've been searching to find

I know it's taken some time

But I know that this is

(I know) I know that this is (the one)

This is the that captured my heart

That makes all the difference

That feels like forever

And this is the dream I've been searching to find

Oh, I know it's taken some time (taken some time)

I know that this is

I know this is the one (I know)

This is the one (I know)

Oh, this is the one
