# Resistance

Par Nasum

*Album : Human 2.0*

Tell me what you believe in

Wage your values against mine

And tell me I am just some piece of shit

With a fucked up mind

Why can't I just shut the fuck up?

Dead - but you're still breathing

A consumer of the highest rank

I wonder when you're gonna realize

That you are just a product

And you shouldn't shit where you eat!

Never free, never been

Always chained to misery

Always blind to what's beyond

The horizon, you're just a drone

It is all so sickening

Your wife and kids & family

You don't care 'cause they're all dead

Just like yourself, they keep them fed

Feed you with lies - destroy your minds

Wake-up call, now you stall

So it's their world, not free for all?

Finally you hear the news

A tainted picture, an awful bruise

Confusion - now the bubble bursts

It's time to hit them where it hurts

Destroy the core, melt the machine

Resistance - where it all begins!

Open your eyes - look into mine

Fed you with lies

Destroyed your minds

Open your eyes

Look into mine and realise

... resist!
