# Lonely Tonight

Par Power Station

*Album : The Power Station*

Lonely tonight, lonely tonight, lonely tonight, lonely tonight

Lonely tonight, lonely tonight, lonely tonight, lonely tonight

We're enchanted, struck by lightning

What can we do when the feeling's so exciting?

We just ran into each other

Now we can't refuse, 'cos the night is so inviting

You sure took me by surprise, I ain't fooling

Everything was synchronized in a movement

When I met you, I knew there was a reason

Every moment that we've shared guarantees it

We. we won't be lonely tonight

**Must be miles ago since we first said "hello"**

We. we won't let us out of our sights

**Passion has to grow, darling because we know**

Riding our tide, luck is with us

No risk to take, when we've got so much to give us

Fate's on our side it's our moment

We're getting warm, 'cos we give each other shivers

**Yeah, let's keep the fire alight**

**Nothing can go wrong, we're together for now on**

**Oh, all the love we excite**

Loneliness has gone, did it take us so long

Can't remember life without your music

Oh, there never was a doubt, don't we prove it?

**You sure took me by surprise, I ain't fooling**

Everything is synchronized in a movement

We're enchanted, stuck by lightning

**What can we do when the feeling's so exciting?**

**We just ran into each other**

**Now we can't refuse, 'cos the night is so inviting**

We won't be lonely tonight

**Must be miles ago since we first said "hello"**

We won't let us out of our sights

**Passion has to grow, darling because we know**

**Yeah, let's keep the fire alight**

**Nothing can go wrong, we're together for now on**

**Oh, all the love we excite**

Loneliness has gone, did it take us so long.
