Nebula Crisis

Par Rebecca Peake

Album : unreleased

Interstellar waterway

Save it for another day

Rain again, rain again

It's just what I wanted

Universal desert gray

Come and lift the fog away

Stars, they just

Stars, they don't light up like they used to

Interstellar waterway

Save it for another day

Rain again, rain again

It's just what I wanted

Universal desert gray

Come and lift the fog away

Stars, they just

Stars, they don't light up like they used to

Supernova wouldn't wake

Put to death for one mistake

Stars, they just

Stars, they don't light up like they used to

I can no longer see the horizon

It's just collapsing black

My gun is all that I can rely on

The sun is pulling back

I travel at light speed

I have all that I need

I don't care where I might end up, end up

I travel at light speed

I have all that I need

I don't care where I die

My engines are failing

Just mindlessly sailing

Through space, time, and Galasume's Vault, Galasume's Vault

What can I do

When all my triumphs are gone?

And everything lost, everything's lost without you
