# Let Me Know (Radio Edit)

Par Roisin Murphy

*Album : Let Me Know CD1*

**I turn the other way**

I'll never turn you down

**You turn me on**

**Don't speak out every meaning**

**I don't belong to you**

You don't belong to me

So don't hold on too tightly...

**Let me know when you're lonely babe**

**Let me know when you're lonely babe**

Happier now than I've been in the past

Gone are the days

Gone are the tears

That was a girl I used to be

The girl that you now see standing in front of you

Could keep going on

Because she believes

In setting you free

**So let me know when you're lonely babe**

**Let me know when you're lonely baby**

**Let me know when you're lonely babe**

**Let me know when you're lonely baby**

**I turn the other way**

I can never turn you down

**You turn me on**

**Don't speak out every meaning**

**I don't belong to you**

Like you don't belong to me

So don't hold on too tightly

Let forever be

**So let me know when you're lonely babe**

**Let me know when you're lonely baby**

**Let me know when you're lonely babe**

**Let me know when you're lonely baby**

Let me know when you're lonely babe (it might be sweet)

**Let me know when you're lonely baby (if we could meet)**

**Let me know when you're lonely babe (along the way)**

**Let me know when you're lonely baby (that could be okay)**

They're all the same in this cynical age

I won't be

Your ball and chain

I risk my reputation

Just to get a room

You always have the reservation

So come lie down beside me (so let me know when you're lonely babe)

**(Let me know when you're lonely baby) Beside me**

(Let me know when you're lonely babe) Beside me

**(Let me know when you're lonely baby) Beside me**

So let me know when you're lonely babe (it might be sweet)

**Let me know when you're lonely baby (if we could meet)**

**Let me know when you're lonely babe (along the way)**

**Let me know when you're lonely baby (that could be okay)**

**That could be okay**

It might be sweet

If we could meet

Along the way

**That could be okay**
