# The Midnight Sun Will Never Set

Par Sarah Vaughan

*Album : More Hits Than Ever*

The midnight sun will never set, it shines forever in my heart

For it was underneath that amber glow, you whispered

Low, "We'll never part." The midnight sun will

Never set, so how could our romance be through?

For in the ever-shining daylight of our summer

Love, the midnight sun was shining too

Now, oh, boy, is night a wire, delight with all the world acquire

And yet I can't eclipse the lips I still desire and adore

I see two silent silhouettes against a flaming sky

And sea, and then I know though I'm a fool to care

Again somewhere, the midnight sun will shine for me

The midnight sun will never set
