Back of My Mind

Par SG Lewis

Album : Anemoia

Something takes a hold

The feeling washes over me

Leave the past behind

But you're always in the back of my mind

Everywhere I go, your face is all I ever see

Leave the past behind

But you're always in the back of my mind

Always in the back of my mind

Always in the back of my mind

Always in the back of my mind

Every night, I lie awake again

It plays out in my mind

The memory of you next to me

Fading into dust

I've tried, but I know that it's not the same

I know how to take the pain away

Something takes a hold

The feeling washes over me

Leave the past behind

But you're always in the back of my mind

Everywhere I go, your face is all I ever see

Leave the past behind

But you're always in the back of my mind

Always in the back of my mind

Always in the back of my mind

Always in the back of my mind

Something takes a hold

The feeling washes over me

Leave the past behind

But you're always in the back of my mind

Everywhere I go, your face is all I ever see

Leave the past behind

But you're always in the back of my mind

Always in the back of my mind

Always in the back of my mind

Always in the back of my mind
