Tell Us How It Ends

Par Silent Theory

Album : Theoretically Speaking III

We want the sun up in the sky

Living our lives just for your eyes

There's something about the dark that's physical

Crawling through the cold black digital

Victims to the hypothetical

We're slaves to the visuals

Bright and subliminal

Light us up again

Tell us how it ends

I don't know what's worse

But I know it hurts

We're on a one way track

With no way back

It's hell on earth

I don't know what's worse

But I know it hurts

We're on a one way track

With no way back

It's hell on earth

We want the sun up in the sky

Living our lives just for your eyes

There's something about the dark that's physical

Crawling through the cold black digital

Victims to the hypothetical

We're slaves to the visuals

Bright and subliminal

Light us up again

Tell us how it ends

I don't know what's worse

But I know it hurts

We're on a one way track

With no way back

It's hell on earth

I don't know what's worse

But I know it hurts

We're on a one way track

With no way back

It's hell on earth
