Let's Go Study

Par Snoop Dogg

Album : Mac & Devin Go to High School: Music From and Inspired by the Movie

ICIBILLET.COM

Yea wassup baby girl

I'm just looking over this homework

I really need some help

You wanna study with me?

That'd be nice, yea

[Chorus]

I wanna go study, baby would you be my buddy?

And help me with my project, cause you are who I roll with

Honestly I know it, take me boo, you the one I wanna go with

Five days out the week, my stay's out the street

It pays to be discreet, your fragrance is sweet

Honeydew, money do

But this ain't about no money, this about me and you making ooh

Take it from me, first day of school I'm looking cool, I got my clothes pressed

I'm a senior but I'm seeming like an old vet

Time will pass me by if I don't graduate this time so I expand my mind

Find ways, to elevate it, motivate it, calculate it, reinstate it

Look at you girl, you got me dedicated

[Chorus]

Uh, put me on the game

Though I keep my head in these books, I'm not a lame

Usually kinda square, I'm trying to use it for a change

Telling bitches things, like if wanna get with me you gon need a lot of brains

And just cause I don't play, who say I can't ball?

My nigga Mac, dude me and him is in the same hall

So don't get mad if I relax and get my bake on

Just promise that you'll try to catch me if my grades fall

[Chorus]

Devin there you are, look at my repertoire

Spitting game, you know for reppin hard

Change that perspective, that's my objective

Cool and oh so collective, connected

Check this, I need you more that you could know

See you the seed in my weed, baby help me grow

Let it go, let me know where to meet at

Student of the week, baby I will be that, you know I need that

[Chorus]

Call you on your phone and never come see you, darling I will never do that

I'm roaming through the halls and asking people who be with you just to try to know where you at

Call you on your phone and never come see you, darling I will never do that

I'm roaming through the halls and asking people who be with you just to try to know where you at

[Chorus]
