Above The Storm

Par Stick Figure

Album : Above The Storm (Single)

Have you ever felt the light of the moon?

Have you ever tried to scream in silence?

Never looked back, no use

All I ever wanted was to live on an island

I never let a good man down

Have you ever seen a sad man smiling?

I never understood this world

All I really want is to live it up, live it up now

Live it up, live it up now

Above the storm

Live it up, live it up now

Have you ever seen a break in the cloud?

The rain's falling down, but the sunshine's shining

Do you ever get lost in the sound?

Turn it up loud, but the sound keeps dying

I wonder where you go when you die?

It's a mystery, but I think our soul starts flying

Said I don't want to wait so long

All you got to do is live it up, live it up now

Live it up, live it up now

Above the storm

Live it up, live it up now

Close your eyes for a moment

Focus on the air that you breathe

Think good thoughts, and now hold them

Now you slip into a dream

And now you slip away to another place

Above the storms and rain

You're miles away, you're miles away

Said if you're just now waking up

I want to send you all some love

And I do it just because I'll find a way (find a way)

Just like a tale as old as time

We've been having a good time

Paint the story of a life, get high with me (get high with me)

I've been holding on for years

I've been facing all these fears

I'm not afraid (not afraid)

So when you put your head to rest

Man, I wish you all the best

For this life, we have been blessed, I could die today

(Give thanks and praise)
