California

Par The Adicts

Album : CD 02 - Smart Alex

California sun

Shining through the window

Beating up and down

Like a yellow yo-yo

Its just the sun

California

California

Annie's got a gun

She knows how to use it

Points it at the sun

Its a California shootout

She's got a gun!

California

California

California

(California)

California

(California)

California

(California)

California

(California)

California sunset

Always clouds my day

California dreamers

With that California way

Speakin' with a stranger lyin' by the pool

Dying to be near you

Oh we look so cool!

Yes we do!
