The Dark Element

Par The Dark Element

Album : The Dark Element-(KIZC-423/4)

She lives in me

And she lives in you, it is true

It's in our nature

So let her burn

An old ritual

Our corruption perpetual

Flesh is always weak

So let her speak

"Follow me, your dead heart queen

One more time into the fray"

Decadent, dissonant, eloquent

The dark element, permanent

In our hearts it always burns

Primitive, chemical, beautiful

The dark element, permanent

She's inside of us all - Dark Element

Don't starve at the feast

The world is yours, give in to the beast

Claim what you deserve

Just let her serve

A crucible so suitable

Desire irrefutable

Decadent, dissonant, eloquent

The dark element, permanent

In our hearts it always burns

Primitive, chemical, beautiful

The dark element, permanent

She's inside of us all - Dark Element

Just one life, just one try

So play to win or not at all

Embrace the dark, let it in your heart

Take the world, it's all for you

Decadent, dissonant, eloquent

The dark element, permanent

In our hearts it always burns

Primitive, chemical, beautiful

The dark element, permanent

She's inside of us all

Decadent, dissonant, eloquent

The dark element, permanent

In our hearts it always burns

Primitive, chemical, beautiful

The dark element, permanent

She's inside of us all - Dark Element
