Nothing's Changing 2003

Par The Grouch

Album : My Baddest Bitches

Yes, YES! Alright, keep it going now, keep it moving

You got a nice pace (that's right)

The Grouch (repeat 2X)

Some things never, change, rear-range

me a, strange on another plane

Constant, motion coastin no gears

Show no fear float

My power never came in surges (nope)

I deal with my urges daily

You say he's different, I'm gifted in my own right

Shone bright since a baby

My ability to separate the yes and no's from the maybe-so's

Therefore I see reality

One way or another I'ma shape that, give or take a calorie

until my salary is truly touched

Fiends for my cuts like I fiend for the guts

when I'm up never limp

Forever pimp my lyrics that's "en truta"

Set that line in stone cause I got it from Medusa

It hit home, cause that's all I do (crack)

Man that's all I have, and that's all I knew

Since ninety-five I used to stand up on the Ave

building, an underground shielding

Yielding to no-one

Wielding my mind skills like a shogun sword it was so fun

More was needed, I was heated off the speed of movement

Improvements were made

I grew with the days time stayed prime

and kept my raised mind rising

Kept my raised mind rising

It's kinda like rolling; it started gradual

I pick that pace up - move so casual

There's a formula - I don't know it though

Karma's in there somewhere - I let it happen

Rapping sometimes forced, too off course choppy

Sloppier than Joe, I'm a Legend you jalopy

Side-busting copies wanna dirty up my name

But you couldn't hurt me only building up my fame

And though that's not my aim I take it all for what it's worth

Doin what I know why I was put upon this Earth

Continous strenous macking, architectural stacking

Backing my folks til the end there's growth

like the fungus, making my thoughts humungous

Wisdom be among us unavoidable, undestroyable (can't break it)

As employable skills multiply

I try, I try. and

1/2 (spoken softly, almost whispered)

Float. float. float.

Listen to my raps.

My raps.

Right here.
