Ship Of Doom

Par Xandria

Album : Theater Of Dimensions (Limited Edition) CD1

Oh, when the sun is down and the moon is up

Our story will be told

Oh, when they call our names and we raise our cups

We are bound to the ship of doom

We will call you all to gather

We will bring you fantasies

We are born from smoke and fire

We will sail the seven seas

One, two, three, four, can you hear the cannons roar?

Five, six, seven, eight, it has been too long a wait

Nine, ten, 11, 12, now we need to raise some hell

So now sing with us

Oh, we have come to your town with our following

To bring you light but we're gone very soon

We are the kings of a world that has never been

Oh, we are bound to the ship of doom

We are born from smoke and fire

We will sail the seven seas

One, two, three, four, see the hungry want some more

Five, six, seven, eight, take it now or it's too late

Nine, ten, 11, 12, soon it's time to leave this place

We will not forget

Oh, we have come to your town with our following

To bring you light but we're gone very soon

We are the kings of a world that has never been

Oh, we are bound to the ship of doom

Oh, when the sun is down and the moon is up

Our story will be told

See the lightning

Feel the thunder

Come and fight

Take us further

Bring us closer

To the glory

Take us further

Drowning deeper

In the story

Once we're home from the storm and the seas

There is nothing we will regret

We will call you all to gather

We will bring you fantasies

We are born from smoke and fire

We will sail the seven seas

We will call you all to gather

We will bring you fantasies

We are born from smoke and fire

We will sail the seven seas

Oh, we have come to your town with our following

To bring you light but we're gone very soon

We are the kings of a world that has never been

Oh, we are bound to the ship of doom

When the sun is down and the moon is up

Our story will be told

Oh, when they call our names and we raise our cups

We are bound to the ship of doom

Bound to the ship of doom
