702-You'll just never know

Par Zondi's

Album : Romantic Ballads III

I bet you never imagined that one day
You'd look around and I just wouldn't be there
So I hear you're leaving, please, don't go
I wanna make it right
'Cause tomorrow is just not promised
You never know what tomorrow holds

You'll just never know
Don't put it off till tomorrow (stay)
Today make it last always (make it last always)

My pride, my destiny
I find a peace of mind when you're next to me
You changed my darkest hour with the gleam from your eye
Simply smiling at me makes my life complete

So what's the use in fussing, fighting
When if you ever leave me, I would be so weak
Oh baby, please understand when I go to sleep at night
I wanna know that everything is alright, you'll never know

You'll just never know, don't put it off 'til tomorrow

Today make it last forever, forever and always (oh)

You'll just never know, don't put it off 'til tomorrow

Today make it last forever and ever, forever, forever and always

And I'm making sure that every time you're around me

You're recreating sweet, brand new memories

Can't let these silly changes aggravate the love in me

Just for a moment you can concentrate on me

Through slow dancing in parking lots

And through hugs and kisses in the restaurant

Oh baby, you can't let the sun go down before you let me know

You're loving me 'cause you'll never know (you'll never know)

You'll just never know, don't put it off 'til tomorrow

Today make it last forever, forever and always

You'll just never know, don't put it off 'til tomorrow (you'll)

Baby today make it last forever and ever, forever, forever and always (forever yeah)

Can't imagine one day without you (day without you)

Don't ever let it cross your mind whatever you do

Nothing else really matters to me

I'm gonna keep loving you every minute, yeah yeah, yeah yeah

You'll just never know, don't put it off 'til tomorrow

Today make it last forever, forever and always (forever)

You'll just never know, don't put it off 'til tomorrow (don't you wait, don't you wait)

Today make it last forever and ever, forever, forever and always (ever, ever oh)

You'll just never know, don't put it off 'til tomorrow (tomorrow's too late)

Today make it last forever, forever and always

You'll just never know, don't put it off 'til tomorrow (you'll never gonna know)

Today make it last forever and ever, forever, forever and always (don't you wait, forever)
